LA ROCLETTE NURSERY

1951

INTRODUCTIONS

For 1951 La Rochette Nursery enters its fourteenth year of fuchsia introductions with two new offerings of its own and one from Mr. Clement Schnabel. We hope you will enjoy the new surprises for 1951.

1951 REITER INTRODUCTIONS

A Hot Number

TRAIL BLAZER (Reiter, Jr. — *Patent applied for*) This is a large flowered trailer in the Anna (Reiter, 1945) coloring but with smaller foliage and soft willowy growth which hangs almost straight down.

Trail Blazer can be compared to a large double flowered Red Spider (Reiter, 1946); growing with the same abandon and blooming with the same flash.

The flowers are of the very long globular type (up to ten petals), the sepals are long and well recurved and the light green foliage is placed loosely and gracefully. The color of the flowers is very close to that of Red Spider; the petals being Deep Magenta (27/0 H.C.C.) and the sepals a slightly paler shade (23/2 H.C.C.).

A top notch hanging basket variety and the finest double magenta trailer in commerce.

It's a Dream!

REVERIE (Reiter, Jr. 1951) This medium sized double is intermediate between Seventeen (Reiter, Jr. 1947) and Crinoline (Reiter, Jr. pat. 1951). The flower is of exceptional form with nicely waved petals and abruptly recurved sepals. The entire flower is of an even pale Tyrian Rose (24/3 H.C.C.) which is retained even as the flower ages. The bushy plant is of medium vigor with small foliage and can be shaped more easily than Seventeen. It does not replace Crinoline but it does add another fine pastel to our collection and it is a must be for fanciers of dainty delicately colored fuchsias.

1951 SCHNABEL INTRODUCTION

A New Look

WEDGEWOOD (Schnabel 1951) Originator's description: "A new 'Blue' and white double of clear and sparkling brilliance. The near-white tube and long glistening sepals frame a spreading double corolla of 'Blue' violet. Wedgewood has small to medium sized leaves which act as a foil to the breath-taking translucent beauty of its flowers. The plant is a bushy upright of self-branching habit and restrained growth" Garden tested in San Francisco where it has demonstrated particular quality as a pot plant because of its free branching habit and even growth. A fine new extension to the fuchsia horizon.

Price of 1951 Introductions \$1.00 in four inch pots.
